Message to the Community

Dear Community Members:

It is my pleasure to present the Luce-Mackinac-Alger-Schoolcraft District Health Department (LMAS) annual report on behalf of the board of health and LMAS to the citizens we serve. Fiscal Year 2019 (FY 2019) was an exciting year for LMAS, below are some of the highlights that LMAS staff have accomplished.

At the start of FY 2019 LMAS began work to establish the LMAS Regional Drinking Water Laboratory. Throughout the year office space was renovated for the lab, equipment was ordered and staff were trained. By the end of FY 2019 we began accepting and analyzing water samples. The lab accepts water samples Monday through Thursday and can perform bacteriological and nitrate analysis.

In early FY 2019 LMAS had another perfect financial audit. The auditor's report gave LMAS an unmodified opinion, the best opinion the auditors provide. In addition to having a great financial audit, LMAS again had revenues exceeding expenses and was able to continue improving the financial health of the department. LMAS also began accepting credit and debit card payments to provide our customers with additional payment options.

LMAS was notified that we received a \$200,000 Rural Communities Opioid Response Planning Grant from the Health Resources and Services Administration (HRSA) in April of 2019. Through this grant we have had great success working with many regional partners such as the local hospitals, mental health agencies, substance abuse providers, Chippewa County Health Department, The Michigan Center for Rural Health, local tribal communities, the faith based community and many others to develop a plan to address the opioid use problem in our area. This work is putting us in a great position to apply for implementation funding in FY 2020.

Another exciting opportunity that occurred in FY 2019 was that we received additional funding to enable us to hire a Licensed Master's Prepared Social Worker to serve students in Manistique Middle and High School. This allows us to provide much needed services to student's right in the school.

In May of 2019 LMAS went through our local public health accreditation process. I am extremely proud to say that out of every program evaluated we did not have one single missed indicator out of the entire review! That demonstrates what a fantastic job our staff are doing to provide services to our citizens. We are now accredited for three more years and will not have another accreditation review until the spring of 2022.

To continue our endeavor to provide the highest level of services to our communities LMAS made a key change to our staffing structure in FY 2019. The department now has a full-time Environmental Health (EH) Director position. With the growth the department has experienced in recent years the need for a full-time EH Director became apparent. Having a full-time EH director will allow us to be more responsive to our client's needs and to better position the department to respond to emerging public health issues.

Message to the Community

LMAS also continued to build upon the work done in 2018 on the first U.P.-wide Community Health Needs Assessment. LMAS conducted several community health improvement planning meetings in FY 2019. That work will continue in FY 2020 and will allow us to tailor local plans to address the specific needs in our communities.

In closing, I thank the staff at LMAS for their hard work and dedication to our mission that has made all of our accomplishments possible. The entire staff at LMAS thank our Board of Health, county commissions, local hospitals, local schools, the Sault Tribe, NorthCare Network, local mental health providers, The Michigan Center for Rural Health and our other local and state partners who all work together to improve the health of the public that it is our privilege to serve.

Sincerely,

Nicholas P. Derusha, MPA, REHS, CFPH
Health Officer

Program Overview

Emergency Preparedness (EP)

The LMAS EP Department focuses on public health threats, such as disease outbreaks and pandemics. Recent examples would be the 2009 H1N1 pandemic, and the Ebola and Zika virus responses. Our EP Department works with community partners to train, plan and conduct exercises to ensure our communities are better prepared to respond to public health emergencies.

Environmental Health (EH)

Our EH Division protects the public from waterborne, foodborne and other vector borne diseases. This is accomplished through permitting, inspecting and educating. The EH Division is responsible for the following programs within the district: food service sanitation, on-site water supply, on-site sewage disposal, campgrounds, soil erosion, swimming pools, campgrounds, rabies, complaint investigation, radon and beach monitoring.

Personal & Family Health (PFH)

The PFH Division utilizes public health prevention techniques to prevent disease and improve the health of our clients and communities. Our PFH Division delivers services in the following areas: immunizations, breast and cervical cancer prevention, family planning, women, infants and children (WIC), maternal and infant health, communicable disease investigation, sexually transmitted disease investigation, tuberculosis control, hearing screening and vision testing.

Healthy Families Upper Peninsula

Healthy Families UP is a free and voluntary home visitation program designed to strengthen families. Healthy Families UP is an affiliate of Healthy Families America which is a nationally recognized evidence-based home visiting program model. Healthy Families UP services begin prenatally or right after the birth of a baby and are offered voluntarily, intensively and over the long-term (up to 3 to 5 years after the birth of the baby). LMAS District Health Department provides the oversight of the Healthy Families implementation across the UP, in partnership with each Health Department in the region.

Community Health Promotion and Health Education

Community Health Promotion and Health Education staff provide services to improve health, promote wellness, and prevent disease in ways that are effective and accessible for all residents in our four counties. LMAS partners with local wellness coalitions, schools, and farmers' markets to make policy, systems, and environmental changes that motivate healthy behavior choices.

The Counseling & Medical Place (C.A.M.P.)

The C.A.M.P. is a school-based child and adolescent health center located at Tahquamenon Area Schools and is supported by a grant through the Michigan Primary Care Association. The center is designed specifically for students aged 10 through 21 years and provides medical, mental health, and substance use disorder services through a Nurse Practitioner and Adolescent Therapist.

Environmental Health

Highlights of Fiscal Year 2019

- Successfully recruited, hired, and trained a new Environmental Health Director, a new clerical staff member in Mackinac County, a new Sanitarian in Luce County, and a new Non-community Public Water Supply Coordinator in Alger County.
- “Met” all minimum program requirements evaluated during our 3-year accreditation review for the food service and sewage programs.
- Provided training to local septic system installers.
- Conducted weekly E.coli monitoring at 4 Great Lakes beaches and 2 inland lakes beaches.
- Continued working with the other U.P. Health Departments to update the Superior Environmental Health Code.
- Received certification in our new water analysis laboratory to analyze bacteria and nitrate water samples.

Healthy Families

Upper Peninsula

Rural Home Visiting Expansion - Michigan Home Visiting Initiative

Highlights of Fiscal Year 2019

- Highest enrollment reached in 2019 was 90 families. Enrollment as of 9/30/19 was 82. The state considers full enrollment to be 90.
- The greatest evidence for Healthy Families America is within families that remain in the program until the target child is 3-5 years old. Longevity in Healthy Families UP continues to grow. Twelve families have been enrolled for more than three years; 33 families have been enrolled between two and three years.

Staff Changes

- One UP health department decided not to remain as part of Healthy Families UP. LMAS hired a new home visitor to continue to provide services in that area.

Healthy Families UP - <i>by the numbers</i>	FY 2019	FY 2018	FY 2017
Referrals/Screens	143	206	191
Positive Screens	143	204	189

Domestic Violence	11%	14%	30%
Families with more than 1 of the Big 3	35%	32%	30%

Community Health Promotion And Health Education

Highlights of Fiscal Year 2019

- New health educator hired for Alger and Luce Counties.
- Community Health Improvement Planning work began in Luce and Schoolcraft Counties. Alger and Mackinac to begin in early 2020.
- Narcan training and kits were supplied to 55 individuals in the LMAS District. Those trained included hotel security directors on Mackinac Island, Schoolcraft Memorial Hospital staff, and all 8 staff of the LMAS Healthy Families UP home visiting program.

Prevention: *Botvins Life Skills Training*

Primary Prevention of Substance Use—area schools			
	FY 2019	FY 2018	FY 2017
Number of participating schools	14	14	12
Number of students (6th—8th grades)	741	718	710

Synar (NorthCare Network)

LMAS Health Education staff once again oversaw the Synar program in the district. Synar provides updated signage and education to vendors who sell tobacco products and e-cigarette materials.

- 81 retailers received education materials.
- 6 retailer checks were conducted (locations selected by the state) with two youth under 18 years of age. Five out of six passed.
 - FY2018 pass rate was 100%; FY2017 pass rate was 75%.

Newberry Farmers' Market

The Farmers' Market had its second season at the LMAS location. Vendor recruitment continues to be a challenge for the Newberry Farmers' Market. New Market sidewalk signs were purchased late in the season and located throughout the community to remind residents to shop at the Farmers' Market.

The C.A.M.P.

Counseling and Medical Place

Highlights of Fiscal Year 2019

- It was a very successful year in medical and mental health.
- A washer and dryer was installed for the use of students.
- We initiated a total hygiene program that offers all hygiene products for kids.
- The teen closet was opened as a way to share clothes and make clothes available for those in need. It has been a huge success.
