

PROGRAM SPOTLIGHT

SUMMER HEALTH CLINICS MACKINAC ISLAND

LMAS District Health Department is proud to continue partnering with Mackinac Straits Health System to provide summer health clinics on Mackinac Island. These clinics help ensure that island residents, seasonal employees, and visitors have access to important health services close to home throughout the busy summer season.

Services available include birth control, Plan B, annual exams, pap smears, mammograms, STI and HIV testing and treatment, breast and cervical cancer screening, and immunizations. Walk-ins are welcome for testing services.

Clinics are held at the Mackinac Island Health Clinic and run from May through September, helping increase access to preventive care and essential public health services during one of the island's busiest times of year.

For a full list of clinic dates and additional information, visit [LMAS Personal Family Health Services](#).

For more information on the Breast and Cervical Cancer Control Navigation Program (BC3NP) that provides free breast and cervical cancer screenings and assistance with follow-up services for women who are uninsured or underinsured, visit [LMAS Breast and Cervical Cancer Control Navigation Program](#).
